OUTREACH AND OTHER ACTIVITIES

I actively involved myself in several outreach activities, and gave lectures of general astronomy to elementary and middle schools in Italy. In Japan I gave lectures to high-school students within the framework of the JSPS Science Dialogue program.

To promote communication between scientists working in AGN, I led the creation, in collaboration with Prof. E. Perlman (Florida Institute of Technology) and Dr. B. Trakhtenbrot (Tel Aviv University), of the “Active Galactic Nuclei” group on Facebook, a space to discuss scientific matters related to AGN, and dedicated exclusively to researchers working in the field. The group has currently about 1200 astronomers from all over the world.

I am co-organising monthly meetings on AGN science in Santiago, which involves researchers from all Universities (PUC, UDP, U. Chile, UNAB) and from ESO, ALMA/JAO and CASSACA.
